

Errata Sheet

Keystone XL Project—Draft Supplemental Environmental Impact Statement

As of March 1, 2013, the following errata and clarifications to the draft Supplemental Environmental Impact Statement (Draft Supplemental EIS) for the Keystone XL Project are presented in the table below.

Table 1 Errata and Clarifications	
Page	Differences in the original text and the amendment
Volume I: Pages 2.1-75 through 2.1-77	<u>Amendment Discussion:</u> During publication, new information was provided to the Department by the Applicant concerning the Bakken Marketlink Project. The Bakken Marketlink Project no longer includes the previously proposed facilities at the Cushing, Oklahoma, tank farm, which included two 250,000 barrel tanks. The new information is included in an updated Bakken Marketlink Project description provided in Section 2.1.12.1, Bakken Marketlink Project, of the Draft Supplemental EIS.
Volumes I and II: Throughout various resource-specific sections of the Draft Supplemental EIS	<u>Original Text Discussion:</u> Throughout the draft Supplemental EIS, various resource-specific sections discuss the affected environment and environmental consequences that were based on the previous Bakken Marketlink Project description, which included the proposed facilities at the Cushing, Oklahoma, tank farm. Since the new information was received during the publication of the Draft Supplemental EIS, the numerous resource-specific discussions throughout the Draft Supplemental EIS do not reflect the new information. The Department requests that all interested parties reviewing resource-specific discussions of the Bakken Marketlink Project disregard the information related to the proposed facilities at the Cushing, Oklahoma, tank farm.
